Amendment to the claims

1.- 83.   (Canceled)

1   84.   (Currently amended)   A method for an internet hosted bill paying and transaction

2   sorting system for at least one debtor that has a debtor's computer and a debtor's computer screen

3   that is responsive to the debtor's computer, at least one creditor that has a creditor's computer and

4   at least one monetary funding activity that has a monetary funding computer so that the debtor,

5   creditor and monetary funding activity can transmit and receive transaction data via their

6   computers over the internet wherein the transaction data is data regarding a plurality of unsorted

7   transactions with portions of the transaction data defining respective unsorted transactions of said

8   plurality of unsorted transactions wherein each unsorted transaction involves paying a bill related

9   to a purchase made by the debtor from the creditor and paying the bill by debiting a monetary

10   funding account with the monetary funding activity; said method comprising the steps of:

11   ~~enabling a display of a plurality of fields with some of the fields being filled with~~

12   ~~transaction data for each transaction on the debtor's computer screen wherein each field, that is~~

13   ~~filled with said transaction data, contains at least a respective part of one of the portions of said~~

14   ~~transaction data that corresponds to a respective transaction;~~

15   enabling a simultaneous display of said plurality of unsorted transactions on the debtor's

16   computer screen with each unsorted transaction of at least some of the unsorted transactions

17   having fields filled with transaction data which are pertinent to the unsorted transaction and

18   having at least one open field open for insertion of a category item pertinent to the unsorted

19   transaction;

20   upon one or more commands by the debtor, enabling the debtor to insert a plurality of the

21   category items selected by the debtor in selected open fields associated with [[the]] said at least

22   some of the unsorted transactions and display respective selected fields filled with selected

23   category items on the debtor's computer ~~screen; and~~ screen simultaneously with said

24   simultaneous display of said plurality of unsorted transactions; and

25   upon one or more commands by the debtor enabling the debtor to sort the unsorted

-2-

26 transactions <u>that are simultaneously displayed on the debtor's computer screen</u> by one or more <u>of</u>

27 <u>the</u> category items selected by the debtor and <u>simultaneously</u> display the <u>unsorted</u> transactions

28 sorted by said one or more <u>of the</u> category items on the debtor's computer screen.

1 85. (Currently amended) A method as claimed in claim 84 further comprising the

2 step of:

3 <u>simultaneously with said simultaneous display of said plurality of unsorted transactions</u>

4 <u>on the debtor's computer screen</u> enabling a display of said plurality of category items as <u>a</u>

5 <u>simultaneous display of</u> category item buttons on the debtor's computer screen <u>with each</u>

6 <u>category item button corresponding to a respective category item</u> so that the debtor can activate

7 selected category item buttons for <u>selecting and simultaneously</u> displaying said selected category

8 items in said selected open fields on the debtor's computer ~~screen.~~ <u>screen simultaneously with</u>

9 <u>said simultaneous display of said plurality of unsorted transactions.</u>

1 86. (Currently amended) A method as claimed in claim 85 further comprising the

2 steps of:

3 ~~enabling~~ <u>wherein said enabling a simultaneous display of unsorted transactions enables</u> a

4 display of rows of line items on the debtor's computer screen with each line item representing

5 [[a]] <u>an unsorted</u> transaction and <u>with the rows of line items</u> having transaction data columns and

6 [[a]] <u>at least one</u> category item column wherein the transaction ~~column has~~ <u>data columns have</u>

7 fields filled with said transaction data and said [[the]] <u>at least one</u> category item column has ~~an~~

8 ~~open field;~~ <u>a plurality of said open fields;</u>

9 upon the debtor activating a selected line item and then activating a selected category

10 item button, enabling a ~~display~~ <u>filling</u> of the open field for the selected line item ~~filled~~ with the

11 category item ~~associated with~~ <u>corresponding to</u> the selected category item button.

1   87.   (Currently amended)   A method as claimed in claim 84 further comprising the

2 steps of:

3   <u>wherein said each unsorted transaction of at least of some of the unsorted transactions,</u>

4 <u>that has said at least one open field, has primary and secondary fields open for insertion of</u>

5 <u>primary and secondary category items respectively pertinent to the unsorted transaction wherein</u>

6 <u>each primary category item is a first part of a purpose for the unsorted transaction and each</u>

7 <u>secondary category item is a second part of the purpose for the unsorted transaction;</u>

8   enabling the debtor to insert ~~at least~~ primary and secondary category items in ~~at least first~~

9 ~~and second open~~ <u>said primary and secondary</u> fields respectively associated with each of at least

10 some of the transactions for displaying ~~first and second~~ <u>said primary and secondary</u> fields filled

11 with <u>said</u> primary and secondary category items respectively on the debtor's computer screen

12 ~~wherein each primary category item is a first part of a purpose for a respective transaction and~~

13 ~~each secondary category item is a second part of the purpose for said respective transaction;~~

14 <u>simultaneously with said simultaneous display of said plurality of unsorted transactions;</u> and

15   upon one or more commands enabling the debtor to sort the <u>unsorted</u> transactions by said

16 at least said primary and secondary category items selected by the debtor and <u>simultaneously</u>

17 display the <u>unsorted</u> transactions sorted by said primary and secondary category items on the

18 debtor's computer screen.

1   88.   (Currently amended)   A method as claimed in claim 87 further comprising the

2 steps of:

3   <u>simultaneously with said simultaneous display of said plurality of unsorted transactions</u>

4 enabling a display of said primary and secondary category items as primary and secondary

5 category item buttons respectively on the debtor's computer screen with each secondary category

6 item button being associated with a respective primary category item button; and

7   upon the debtor activating selected primary and secondary category item buttons enabling

8 a <u>selection and</u> display of the selected primary and secondary category items in selected ~~first and~~

9 ~~second open~~ <u>primary and secondary</u> fields respectively on the debtor's computer screen.

1   89. (Currently amended)   A method as claimed in claim 88 further comprising the
2   steps of:
3   ~~enabling~~ wherein said enabling a simultaneous display of said plurality of unsorted
4   transactions enables a display of rows of line items on the debtor's computer screen with each
5   line item representing [[a]]an unsorted transaction and with the rows of line items having
6   transaction data columns and at least primary and secondary category item columns wherein the
7   transaction ~~column has~~ data columns have fields filled with said transaction data and [[each]] the
8   primary and secondary category item ~~column has an open field;~~ columns have said primary and
9   secondary fields respectively; and
10   upon the debtor activating a selected line item and then activating a selected primary or
11   secondary category item button, enabling a ~~display~~ selection and filling of the [[open]] primary or
12   secondary field in the primary or secondary category column respectively for the selected line
13   item ~~filled~~ with the category item ~~associated with~~ corresponding to the selected primary or
14   secondary category item button.

1   90. (Previously presented)   A method as claimed in claim 84 further comprising the
2   step of:
3   enabling a display in at least some of the sorted transactions on the debtor's computer
4   screen which includes at least product or services purchased, amount paid for the product or
5   services and date paid transaction data.

1   91. (Currently amended)   A method as claimed in claim 84 further ~~comprising the~~
2   ~~step of:~~ including a bill paying method which comprises the steps of:
3   enabling a display ~~of the name~~ of said at least one monetary funding activity as a
4   monetary funding activity button on the debtor's computer ~~screen;~~ screen simultaneously with
5   said simultaneous display of said plurality of unsorted transactions;
6   upon the debtor activating the monetary funding activity button, enabling the debtor to
7   display an account balance in a monetary funding account with [[the]] said at least one monetary
8   funding activity on the debtor's computer ~~screen;~~ screen simultaneously with said simultaneous

9   display of said plurality of unsorted transactions; and

10   enabling a display on said computer screen of a payment approved button that, when

11   activated by the debtor, debits said monetary funding account to pay said bill after said account

12   balance is displayed. simultaneously with said simultaneous display of said plurality of unsorted

13   transactions so that after the account balance is displayed, the debtor is enabled to select an

14   unsorted transaction and activate the payment approved button to pay the bill associated with the

15   selected unsorted transaction.

1   92. (Currently amended)   A method for an internet hosted bill paying and transaction

2   sorting system for at least one debtor that has a debtor's computer and a debtor's computer screen

3   that is responsive to the debtor's computer, at least one creditor that has a creditor's computer and

4   at least one monetary funding activity that has a monetary funding computer so that the debtor,

5   creditor and monetary funding activity can transmit and receive transaction data via their

6   computers over the internet wherein the transaction data is data regarding a plurality of

7   transactions with portions of the transaction data defining respective transactions of said plurality

8   of unsorted transactions wherein each unsorted transaction involves paying a bill related to a

9   purchase made by the debtor from the creditor and paying the bill by debiting a monetary funding

10   account with the monetary funding activity and wherein a plurality of fields filled with

11   transaction data for each transaction a simultaneous display of said plurality of unsorted

12   transactions are transmitted to the debtor's computer via the internet for display on the debtor's

13   computer screen wherein each field filled with said transaction data contains at least a respective

14   part of one of the portions of said transaction data that corresponds to a respective unsorted

15   transaction and wherein one or more open fields are displayed for each unsorted transaction on

16   said computer screen, each unsorted transaction of at least some of the unsorted transactions has

17   fields filled with transaction data which are pertinent to the unsorted transaction and has at least

18   one open field open for insertion of a category item pertinent to the unsorted transaction, said

19   method comprising the steps of:

20   upon one or more commands by the debtor, enabling the debtor to insert a plurality of the

21   category items selected by the debtor in selected open fields associated with [[the]] said at least

-6-

22 some of the unsorted transactions and display respective selected fields filled with selected

23 category items on the debtor's computer screen; and screen simultaneously with said

24 simultaneous display of said plurality of unsorted transactions; and

25   upon one or more commands by the debtor enabling the debtor to sort the unsorted

26 transactions that are simultaneously displayed on the debtor's computer screen by one or more of

27 the category items selected by the debtor and simultaneously display the unsorted transactions

28 sorted by said one or more of the category items on the debtor's computer screen.

1   93. (Currently amended)   A method as claimed in claim 92 further comprising the

2   step of:

3   simultaneously with said simultaneous display of said plurality of unsorted transactions

4   on the debtor's computer screen, enabling a display of said plurality of category items as a

5   simultaneous display of category item buttons on the debtor's computer screen with each

6   category item button corresponding to a respective category item so that the debtor can activate

7   selected category item buttons for selecting and simultaneously displaying said selected category

8   items in said selected open fields on the debtor's computer screen. screen simultaneously with

9   said simultaneous display of said plurality of unsorted transactions.

1   94. (Currently amended)   A method as claimed in claim 93 further comprising the

2   steps of:

3   enabling wherein said enabling of a simultaneous display of said unsorted transactions on

4   the debtor's computer screen enables a display of rows of line items on the debtor's computer

5   screen with each line item representing [[a]] an unsorted transaction and with the rows of line

6   items having transaction data columns and [[a]] at least one category item column wherein the

7   transaction column has data columns have fields filled with said transaction data and said [[the]]

8   at least one category item column has an open field; a plurality of said open fields;

9   upon the debtor activating a selected line item and then activating a selected category

10 item button, enabling a display filling of the open field for the selected line item filled with the

11 category item associated with corresponding to the selected category item button.

1   95. (Currently amended)   A method as claimed in claim 92 further comprising the

2   steps of:

3   wherein said each unsorted transaction of at least some of the unsorted transactions, that

4   has said at least one open field, having primary and secondary fields open for insertion of

5   primary and secondary category items respectively pertinent to each unsorted transaction wherein

6   each primary category item is a first part of a purpose for the unsorted transaction and each

7   secondary category item is a second part of the purpose for the unsorted transaction;

8   enabling the debtor to insert at least primary and secondary category items in at least first

9   and second open said primary and secondary fields respectively associated with each of at least

10   some of the transactions for displaying first and second said primary and secondary fields filled

11   with said primary and secondary category items respectively on the debtor's computer screen

12   wherein each primary category item is a first part of a purpose for a respective transaction and

13   each secondary category item is a second part of the purpose for said respective transaction;

14   simultaneously with said simultaneous display of said plurality of unsorted transactions; and

15   upon one or more commands enabling the debtor to sort the unsorted transactions by said

16   at least said primary and secondary category items selected by the debtor and simultaneously

17   display the unsorted transactions sorted by said primary and secondary category items on the

18   debtor's computer screen.

1   96. (Currently amended)   A method as claimed in claim 95 further comprising the

2   steps of:

3   simultaneously with said simultaneous display of said plurality of unsorted transactions

4   enabling a display of said primary and secondary category items as primary and secondary

5   category item buttons respectively on the debtor's computer screen with each secondary category

6   item button being associated with a respective primary category item button; and

7   upon the debtor activating selected primary and secondary category item buttons enabling

8   a selection and display of the selected primary and secondary category items in selected said first

9   and second open selected primary and secondary fields respectively on the debtor's computer

-8-

10   screen.

1   97. (Currently amended)   A method as claimed in claim 96 further comprising the

2   steps of:

3   ~~enabling~~ wherein said simultaneous display of said plurality of unsorted transactions ~~a~~

4   ~~display of~~ displays rows of line items on the debtor's computer screen with each line item

5   representing [[a]]an unsorted transaction and with the rows of line items having transaction data

6   columns and at least primary and secondary category item columns wherein the transaction

7   ~~column has~~ data columns have fields filled with said transaction data and [[each]] the primary

8   and secondary category item ~~column has an open field;~~ columns have said primary and secondary

9   fields respectively; and

10   upon the debtor activating a selected line item and then activating a selected primary or

11   secondary category item button, enabling a ~~display~~ selection and filling of the [[open]] primary or

12   secondary field in the primary or secondary category column respectively for the selected line

13   item ~~filled~~ with the category item ~~associated with~~ corresponding to the selected primary or

14   secondary category item button.

1   98. (Previously presented) A method as claimed in claim 92 further comprising the

2   step of:

3   enabling a display in at least some of the sorted transactions on the debtor's computer

4   screen which includes at least product or services purchased, amount paid for the product or

5   services and date paid transaction data.

1   99. (Currently amended)   A method as claimed in claim 92 further ~~comprising the~~

2   ~~steps of:~~ including a bill paying method which comprises the steps of:

3   enabling a display ~~on said computer screen of the name~~ of said at least one monetary

4   funding activity as a monetary funding activity ~~button;~~ button on the debtor's computer screen

5   simultaneously with said simultaneous display of said plurality of unsorted transactions;

6   upon the debtor activating the monetary funding activity button, enabling the debtor to

7   display an account balance in a monetary funding account with [[the]] <u>said at least one</u> monetary

8   funding activity on the debtor's computer ~~screen;~~ <u>screen simultaneously with said simultaneous</u>

9   <u>display of said plurality of unsorted transactions;</u> and

10   enabling a display on said computer screen of a payment approved button ~~that, when~~

11   ~~activated by the debtor, debits said monetary funding account to pay said bill after said account~~

12   ~~balance is displayed.~~ <u>simultaneously with said simultaneous display of said plurality of unsorted</u>

13   <u>transactions so that after the account balance is displayed, the debtor is enabled to select an</u>

14   <u>unsorted transaction and activate the payment approved button to pay the bill associated with the</u>

15   <u>selected unsorted transaction.</u>

1   100. (Currently amended)   Computer readable medium or media for an internet hosted

2   bill paying system <u>with transaction sorting</u> for at least one debtor that has a debtor's computer and

3   a debtor's computer screen that is responsive to the debtor's computer, at least one creditor that

4   has a creditor's computer and at least one monetary funding activity that has a monetary funding

5   computer so that the debtor, creditor and monetary funding activity can transmit and receive

6   transaction data via their computers over the internet wherein the transaction data is data

7   regarding a plurality of <u>unsorted</u> transactions with portions of the transaction data defining

8   respective <u>unsorted</u> transactions of said plurality of <u>unsorted</u> transactions wherein each <u>unsorted</u>

9   transaction involves paying a bill related to a purchase made by the debtor from the creditor and

10   paying the bill by debiting a monetary funding account with the monetary funding activity and

11   wherein a plurality of fields filled with transaction data for each <u>unsorted</u> transaction are

12   transmitted to the debtor's computer via the internet for display on the debtor's computer screen

13   wherein each field filled with said transaction data contains at least a respective part of one of the

14   portions of said transaction data that corresponds to a respective <u>unsorted</u> transaction and

15   wherein one or more open fields are displayed for each <u>unsorted</u> transaction in said computer

16   screen, said computer readable medium or media having computer executable instructions for

17   performing the steps of:

18   ~~transmitting a plurality of fields to the debtor's computer via the internet for display on~~

19   ~~the debtor's computer screen with some of the fields being filled with transaction data for each~~

20 transaction wherein each field, that is filled with said transaction data, contains at least a

21 respective part of one of the portions of said transaction data that corresponds to a respective

22 transaction;

23   transmitting a simultaneous display of said plurality of unsorted transactions on the

24 debtor's computer screen with each unsorted transaction of at least some of the unsorted

25 transactions having fields filled with transaction data which are pertinent to the unsorted

26 transaction and having at least one open field open for insertion of a category item pertinent to

27 the unsorted transaction;

28   upon one or more commands by the debtor, inserting a plurality of the category items

29 selected by the debtor in selected open fields associated with [[the]] said at least some of the

30 unsorted transactions and displaying respective selected fields filled with selected category items

31 on the debtor's computer screen; and screen simultaneously with said simultaneous display of

32 said plurality of unsorted transactions; and

33   upon one or more commands by the debtor, sorting the unsorted transactions that are

34 simultaneously displayed on the debtor's computer screen by one or more of the category items

35 selected by the debtor and simultaneously displaying the unsorted transactions sorted by said one

36 or more of the category items on the debtor's computer screen.

1   101. (Currently amended)   Computer readable medium or media as claimed in claim

2 100 having computer executable instructions for further performing the step of:

3   simultaneously with said simultaneous display of said plurality of unsorted transactions

4 on the debtor's computer screen, displaying said plurality of category items as a simultaneous

5 display of category item buttons on the debtor's computer screen with each category item button

6 corresponding to a respective category item so that the debtor can activate [[said]] selected

7 category item buttons for selecting and simultaneously displaying said selected category items in

8 said selected open fields on the debtor's computer screen. screen simultaneously with said

9 simultaneous display of said plurality of unsorted transactions.

1   102. (Currently amended)   A method as claimed in claim 101 further comprising the

-11-

2   steps of:

3   ~~enabling~~ wherein said transmitting of said simultaneous display of said plurality of

4   unsorted transactions on the debtor's computer screen includes transmitting a display of rows of

5   line items on the debtor's computer screen with each line item representing [[a]] an unsorted

6   transaction and with the rows of line items having transaction data columns and [[a]] at least one

7   category item column wherein the transaction ~~column has~~ data columns have fields filled with

8   said transaction data and [[the]] said at least one category item column has ~~an open field;~~ a

9   plurality of open fields; and

10   upon the debtor activating a selected line item and then activating a selected category

11   item button, ~~displaying~~ filling the open field for the selected line item ~~filled~~ with the category

12   item ~~associated with~~ corresponding to the selected category item button.

1   103. (Currently amended) Computer readable medium or media as claimed in claim

2   100 having computer executable instructions for further performing the steps of:

3   wherein said transmitting of each unsorted transaction with at least one open field

4   includes transmitting each unsorted transaction with primary and secondary fields open for

5   insertion of primary and secondary category items respectively pertinent to each unsorted

6   transaction wherein each primary category item is a first part of a purpose for the unsorted

7   transaction and each secondary category item is a second part of the purpose for the unsorted

8   transaction;

9   upon one or more commands by the debtor, inserting at least primary and secondary

10   category items ~~in at least first and second open~~ selected by the debtor in said primary and

11   secondary fields respectively associated with each of at least some of the transactions for

12   displaying ~~first and second~~ said primary and secondary fields filled with said primary and

13   secondary category items respectively on the debtor's computer screen ~~wherein each primary~~

14   ~~category item is a first part of a purpose for a respective transaction and each secondary category~~

15   ~~item is a second part of the purpose for said respective transaction;~~ simultaneously with said

16   simultaneous display of said plurality of unsorted transactions; and

17   upon one or more commands by the debtor, sorting the unsorted transactions by said at

-12-

18   least primary and secondary category items selected by the debtor and <u>simultaneously</u> displaying

19   the <u>unsorted</u> transactions sorted by said primary and secondary category items on the debtor's

20   computer screen.

1   104.   (Currently amended)   Computer readable medium or media as claimed in claim

2   103 having computer executable instructions for further performing the steps of:

3   <u>simultaneously with said simultaneous display of said plurality of unsorted transactions</u>

4   displaying said primary and secondary category items as primary and secondary category item

5   buttons respectively on the debtor's computer screen with each secondary category item button

6   being associated with a respective primary category item button; and

7   upon the debtor activating selected primary and secondary category item buttons,

8   displaying the selected primary and secondary category items in selected ~~first and second open~~

9   <u>primary and secondary</u> fields respectively on the debtor's computer screen.

1   105.   (Currently amended)   A method as claimed in claim 104 further comprising the

2   steps of:

3   <u>simultaneously with said simultaneous display of said plurality of unsorted transactions</u>

4   displaying rows of line items on the debtor's computer screen with each line item representing

5   [[a]] <u>an unsorted</u> transaction and <u>with the rows of line items</u> having transaction data columns and

6   at least primary and secondary category item columns wherein the transaction ~~column has~~ <u>data</u>

7   <u>columns have</u> fields filled with said transaction data and [[each]] <u>the</u> primary and secondary

8   category item ~~column has an open field;~~ <u>columns have said primary and secondary fields</u>

9   <u>respectively;</u> and

10   upon the debtor activating a selected line item and then activating a selected primary or

11   secondary category item button, ~~displaying~~ <u>filling</u> the [[open]] <u>primary or secondary</u> field in the

12   primary or secondary category column respectively for the selected line item ~~filled~~ with the

13   category item ~~associated with~~ <u>corresponding to</u> the selected primary or secondary category item

14   button.

1   106. (Previously presented) A method as claimed in claim 100 further comprising the

2   step of:

3   displaying at least some of the sorted transactions on the debtor's computer screen which

4   includes at least product or services purchased, amount paid for the product or services and date

5   paid transaction data.

1   107. (Currently amended)   Computer readable medium or media as claimed in claim

2   100 having computer executable instructions for further performing the step of:

3   displaying ~~the name of~~ said at least one monetary funding activity as a monetary funding

4   activity button on the debtor's computer ~~screen;~~ screen simultaneously with said simultaneous

5   display of said plurality of unsorted transactions;

6   upon the debtor activating the monetary funding activity button, displaying an account

7   balance in said monetary funding account with [[the]] said at least one monetary funding activity

8   on the debtor's computer ~~screen;~~ screen simultaneously with said simultaneous display of said

9   plurality of unsorted transactions; and

10   displaying on said computer screen a payment approved button ~~that, when activated by~~

11   ~~the debtor, debits said monetary funding account to pay said bill after said account balance is~~

12   ~~displayed.~~ simultaneously with said simultaneous display of said plurality of unsorted

13   transactions so that after the account balance is displayed, the debtor is enabled to select an

14   unsorted transaction and activate the payment approved button to pay the bill associated with the

15   selected unsorted transaction.

1   108. (Currently amended)   A computer readable medium or media for an internet

2   hosted bill paying and transaction sorting system for at least one debtor that has a debtor's

3   computer and a debtor's computer screen that is responsive to the debtor's computer, at least one

4   creditor that has a creditor's computer and at least one monetary funding activity that has a

5   monetary funding computer so that the debtor, creditor and monetary funding activity can

6   transmit and receive transaction data via their computers over the internet wherein the transaction

7   data is data regarding a plurality of unsorted transactions with portions of the transaction data

8   defining respective <u>unsorted</u> transactions of said plurality of <u>unsorted</u> transactions wherein each

9   transaction involves paying a bill related to a purchase made by the debtor from the creditor and

10   paying the bill by debiting a monetary funding account with the monetary funding activity and

11   ~~wherein a plurality of fields filled with transaction data for each transaction are transmitted to the~~

12   ~~debtor's computer via the internet for display on the debtor's computer screen wherein each field,~~

13   ~~that is filled with said transaction data, contains at least a respective part of one of the portions of~~

14   ~~said transaction data that corresponds to a respective transaction and wherein one or more open~~

15   ~~fields are displayed for each transaction in said computer screen,~~ <u>wherein a simultaneous display</u>

16   <u>of said plurality of unsorted transactions is transmitted to the debtor's computer via the internet</u>

17   <u>for display on the debtor's computer screen with each unsorted transaction of at least some of the</u>

18   <u>unsorted transactions having fields filled with transaction data which are pertinent to the unsorted</u>

19   <u>transaction and having at least one open field open for insertion of a category item pertinent to</u>

20   <u>the unsorted transaction,</u> said computer readable medium having computer executable

21   instructions for performing the steps of:

22   upon one or more commands by the debtor, inserting a plurality of <u>the</u> category items

23   selected by the debtor in selected open fields associated with [[the]] <u>said at least some of the</u>

24   <u>unsorted</u> transactions and displaying <u>respective</u> selected fields filled with selected category items

25   on the debtor's computer ~~screen, and~~ <u>screen simultaneously with said simultaneous display of</u>

26   <u>said plurality of unsorted transactions; and</u>

27   upon one or more commands by the debtor, sorting the <u>unsorted</u> transactions <u>that are</u>

28   <u>simultaneously displayed on the debtor's computer screen</u> by one or more <u>of the</u> category items

29   selected by the debtor and <u>simultaneously</u> displaying the <u>unsorted</u> transactions sorted by said one

30   or more <u>of the</u> category items on the debtor's computer screen.

1   109. (Currently amended)   A computer readable medium or media as claimed in claim

2   108 having computer executable instructions for further performing the step of:

3   <u>simultaneously with the simultaneous display of the unsorted transactions</u> displaying said

4   plurality of category items as <u>a simultaneous display of</u> category item buttons on the debtor's

5   computer screen <u>with each category item button corresponding to a respective category item</u>

6   button so that the debtor can activate [[said]] selected category item buttons for selecting and

7   simultaneously displaying said selected category items in said selected open fields on the

8   debtor's computer screen. screen simultaneously with said simultaneous display of said plurality

9   of unsorted transactions.

1   110.   (Currently amended) · A method as claimed in claim 109 further comprising the

2   steps of:

3   enabling wherein the transmitting of said simultaneous display of said plurality of

4   unsorted transactions on the debtor's computer screen includes transmitting a display of rows of

5   line items on the debtor's computer screen with each line item representing [[a]] an unsorted

6   transaction and with the rows of line items having transaction data columns and [[a]] at least one

7   category item column wherein the transaction column has data columns have fields filled with

8   said transaction data and said [[the]] at least one category item column has an open field; a

9   plurality of open fields; and

10   upon the debtor activating a selected line item and then activating a selected category

11   item button, displaying filling the open field for the selected line item filled with the category

12   item associated with corresponding to the selected category item button.

1   111.   (Currently amended)   A computer readable medium or media as claimed in claim

2   108 having computer executable instructions for performing the steps of:

3   wherein said transmitting of each unsorted transaction with at least one open field

4   includes transmitting each unsorted transaction with primary and secondary fields open for

5   insertion of selected primary and secondary category items respectively pertinent to each

6   unsorted transaction wherein each primary category item is a first part of a purpose for the

7   unsorted transaction and each secondary category item is a second part of the purpose for the

8   unsorted transaction;

9   upon one or more commands by the debtor, inserting at least primary and secondary

10   category items in at least first and second open selected by the debtor in said primary and

11   secondary fields respectively associated with each of at least some of the transactions for

-16-

12 displaying ~~first and second~~ <u>said primary and secondary</u> fields filled with <u>said</u> primary and

13 secondary category items respectively on the debtor's computer screen ~~wherein each primary~~

14 ~~category item is a first part of a purpose for a respective transaction and each secondary category~~

15 ~~item is a second part of the purpose for said respective transaction;~~ <u>simultaneously with said</u>

16 <u>simultaneous display of said plurality of unsorted transactions;</u> and

17   upon one or more commands by the debtor, sorting the <u>unsorted</u> transactions by <u>said at</u>

18 <u>least</u> primary and secondary category items selected by the debtor and <u>simultaneously</u> displaying

19 the <u>unsorted</u> transactions sorted by said primary and secondary category items on the debtor's

20 computer screen.

1   112. (Currently amended) A computer readable medium or media as claimed in claim

2 111 having computer executable instructions for performing the steps of:

3   <u>simultaneously with said simultaneous display of said plurality of unsorted transactions</u>

4 displaying said primary and secondary category items as primary and secondary category item

5 buttons respectively on the debtor's computer screen with each secondary category item button

6 being associated with a respective primary category item button; and

7   upon the debtor activating selected primary and secondary category item buttons,

8 displaying the selected primary and secondary category items in selected ~~first and second open~~

9 <u>primary and secondary</u> fields respectively on the debtor's computer screen.

1   113. (Currently amended) A method as claimed in claim 112 further comprising the

2 steps of:

3   <u>simultaneously with said simultaneous display of said plurality of unsorted transactions,</u>

4 displaying rows of line items on the debtor's computer screen with each line item representing

5 [[a]] <u>an unsorted</u> transaction and <u>with the rows of line items</u> having transaction data columns and

6 at least primary and secondary category item columns wherein the transaction ~~column has~~ <u>data</u>

7 <u>columns have</u> fields filled with said transaction data and [[each]] <u>the</u> primary and secondary

8 category item ~~column has an open field;~~ <u>columns have said primary and secondary fields</u>

9 <u>respectively;</u> and

10   upon the debtor activating a selected line item and then activating a selected primary or

11   secondary category item button, ~~displaying~~ <u>filling</u> the [[open]] <u>primary or secondary</u> field in the

12   primary or secondary category column respectively for the selected line item ~~filled~~ with the

13   category item ~~associated with~~ <u>corresponding to</u> the selected primary or secondary category item

14   button.

1   114. (Previously presented) A method as claimed in claim 108 further comprising the

2   step of:

3   displaying at least some of the sorted transactions on the debtor's computer screen which

4   includes at least product or services purchased, amount paid for the product or services and date

5   paid transaction data.

1   115. (Currently amended)   A computer readable medium or media as claimed in claim

2   108 having computer executable instructions for further performing the steps of:

3   displaying ~~the name of~~ said at least one monetary funding activity as a monetary funding

4   activity button on the debtor's computer ~~screen;~~ <u>screen simultaneously with said simultaneous</u>

5   <u>display of said plurality of unsorted transactions;</u>

6   upon the debtor activating the monetary funding activity button, displaying an account

7   balance in said monetary funding account with [[the]] <u>said at least one</u> monetary funding activity

8   on the debtor's computer ~~screen;~~ <u>screen simultaneously with said simultaneous display of said</u>

9   <u>plurality of unsorted transactions;</u> and

10   displaying on said computer screen a payment approved button ~~that, when activated by~~

11   ~~the debtor, debits said monetary funding account to pay said bill after said account balance is~~

12   ~~displayed.~~ <u>simultaneously with said simultaneous display of said plurality of unsorted</u>

13   <u>transactions so that after the account balance is displayed, the debtor is enabled to select an</u>

14   <u>unsorted transaction and activate the payment approved button to pay the bill associated with the</u>

15   <u>selected unsorted transaction.</u>
